

The XM Cyber Pathfinder Partner Program

Your company plays a critical role in helping customers build and maintain a strong cyber security program.

The next generation of security requires adding a continuous analysis of every potential attack path while providing additional contextual information to alerts and incident reports. Attack Path Management is one of the fastest growth spaces in Cyber Security, and presents a great opportunity to develop a new pipeline. Attack Path Management can help your customers with:

Hybrid Cloud Security

Cyber Risk Reporting

Vulnerability Prioritization

Active Directory Security

SOC Optimization

Supply Chain and Third Party Risk

Breach and Attack Simulation

Ransomware Readiness.

XM Cyber is changing the way organizations approach cyber risk. With the XM Cyber Attack Path Management platform, you can continuously see your hybrid network through the eyes of an attacker and spot attacks before they happen. Reduce your internal attack surface by uncovering hidden attack paths across cloud and on-prem networks. Cut them off at key junctures. And eradicate risk with a fraction of the effort.

Help your customer's security and C suite teams understand and identify all the ways an attacker can exploit your customers environment in order to move laterally to the critical asset and compromise it. Your customers will understand what are the most critical points they need to fix (choke points) and how much risk will be eradicated by doing so. They would be able to report easily to the business not only what is their current security posture, but also how much the IT fixing and remediation improved it their crown jewel assets, continuously monitor their security posture and understand how they could be attacked and close those gaps rapidly with prioritized remediation step-by-step guidance.

Now is the time to join the XM Cyber ecosystem of select partners. We've recently expanded our integration to include the leading Cloud Infrastructure, Vulnerability Management, SOAR/SIEM, Ticketing and Endpoint Security Providers, so we easily complement your current go-to-market offerings.

Once we complete the onboarding process, your account team works with you to develop short- and long-term goals focusing on customer happiness, sales team effectiveness and revenue development. Their expertise in the security industry and channel success has already driven a global expansion of XM Cyber through the channel.

3 Key Reasons to Add XM Cyber to Your Portfolio of Offerings:

1

Increase your revenues and profitability. XM Cyber gives you multiple ways to engage your customers, gain new ones, and build revenues via sales and service offerings. XM Cyber partners gain access to deals that range from \$100K - \$10M, ensuring steady growth.

2

Gain a strategic advantage. By adding context to your existing flow of alerts and incidents, you become more operationally efficient and provide a stronger overall solution for your customers.

3

Widen your portfolio. Now you can add the latest in smart security offerings and get a competitive edge that complements and integrates with your entire ecosystem.

Gain the XM Cyber Advantage
